Infortar increased operating profit by 94% to EUR 51 million in the first half of 2026, while EBITDA rose by 31% to EUR 111 million. Revenue remained broadly unchanged at EUR 946 million. The Group invested EUR 50 million during the period.

“Profitable growth and investment have long been at the heart of our strategy. We have signed major acquisition agreements and expanded our holdings across sectors and geographies. The first-half results demonstrate that the decisions we have made are creating long-term value and that profitable growth is generated not only through one-off transactions, but also through our day-to-day business operations,” said Ain Hanschmidt, Chairman of the Management Board of Infortar.

“In the energy segment, Elenger continued to balance investments between transition fuels and renewable energy. As Estonia’s largest biomethane producer, we opened a new biomethane plant at the Halinga dairy farm complex in June. The plant will produce green gas from local feedstock, strengthening both energy and food security.

“We also maintained sufficient reserves of Western-sourced natural gas and secured supplies for the next heating season. Half of the volumes required for the next heating season have already arrived in the region via LNG terminals in Finland and Lithuania, while agreements are in place for the remaining deliveries, ensuring security of supply for our customers,” Hanschmidt noted.

"To demonstrate our confidence in Tallink's long-term prospects, we further increased our shareholding. Tallink generates stable revenue, supported in recent months by growth in cargo volumes, while the current management team is focused on improving profitability and efficiency," Hanschmidt said.

Major Events
Maritime transport

In the second quarter, Tallink carried 1,454,725 passengers, representing a 2.2% decrease year-on-year. The number of cargo units transported increased by 2.9% to 68,986, while the number of passenger vehicles was down by 6.5% to 199,025.

At quarter-end, Tallink operated 11 vessels: two shuttle vessels, five cruise ferries serving regular routes, three chartered-out vessels and one vessel in lay-up.

During the quarter, Tallink's investments totalled EUR 7.3 million.

Energy

In the second quarter, natural gas consumption in the Finnish-Baltic region totalled 7.0 TWh, decreasing by 7% compared with the previous year (7.6 TWh).

Elenger Grupp's gas and electricity sales volumes in the second quarter decreased by 34% year on year, totalling 3.3 TWh (compared to 4.9 TWh in Q2 2025). The decline was primarily driven by a reduction in wholesale sales. Elenger's gas market share in the Finnish-Baltic market increased to 29% in Q2 2026, and Estonia accounted for 15% of energy sales.

Real estate and infrastructure

In Q2 2026, INF Infra, part of the Infortar group, continued the construction of Rail Baltica's mainline on the Kangru-Saku section. The contract value is EUR 67.2 million, and the work is planned to continue until March 2028.
In Q2 2026, construction of the DEPO DIY store continued on the property adjacent to the Tallink Tennis Centre. The project is scheduled for completion in autumn 2026.
