Trophy Games Development A/S (Ticker: TGAMES) today announced the publication of its Annual Report for the 2025 financial year. The year marked a landmark period of accelerated performance, driven by the rapid scaling of the company's Transport Series and strategic optimisations in its monetisation mix.

"2025 was a period of strategic execution and operational validation for Trophy Games," said Søren Westrup Gleie, CEO & Founder of Trophy Games. "The year was about making our strategy work in practice - executing with focus, investing through volatility, and building scalable growth by staying true to our niche communities and data-driven model. We exit the year in a position of strength, with a stronger IP portfolio, a more diversified user acquisition network, and clear pathways for continued profitable growth."

Operational Milestones:

The top-line growth was predominantly fueled by the "Big 3" titles within the Transport Game Series: Airline Manager, Truck Manager, and the newly launched Farm Manager.

- Farm Manager, launched in July 2025 following 5 million pre-registrations, became the standout success of the year, contributing DKK 22.0m in its first six months.
- Truck Manager, launched in November 2024, emerged as a primary growth engine. Reaching its first full year of operation, the game generated DKK 25.2m in revenue, driven by foundational improvements and successful gameplay balancing throughout the year.

Financial Outlook for 2026:

Entering 2026 from a position of operational strength, Trophy Games remains focused on optimising its current portfolio while investing with discipline in next-generation titles like *Train Manager 2* and *Space Manager*.
